Hello,

I am writing in response to the opening for a Jr. Web Developer.

I can offer experience with many web technologies including converting Photoshop mockups into hand-coded HTML & CSS websites, implementing JavaScript (ES6), Wordpress (Genesis framework), React (SPAs), PHP, MySQL, Git and responsive web design. In addition, I have proven excellent communication skills and a great eye for detail, all of which should make me an ideal candidate for this opening.

To view projects I built, please visit my portfolio site at www.caseymoths.com. You may find my code hosted on Github at https://github.com/caseyadam.

Thank you for your consideration! I would welcome the chance to speak with you sometime.

Warm regards,

Casey Moths
